

CURRICULUM VITAE

OTIENO HILARY OMONDI

Kenyan | Male

+254 759 865 977

hilaryomondi08@gmail.com | github.com/luckylittleman | linkedin.com/in/hilary-omondi

PROFESSIONAL SUMMARY

I am a Computer Science student who is driven and pays attention to details. I have experience with full-stack software development, machine learning and network engineering. I know how to build backends using Python and FastAPI. I also know how to develop frontends with React.. I have experience managing production database architectures.

I worked on projects in school where I built predictive analytics and modular neural networks from scratch. I also gained experience in the industry during my time at an Internet Service Provider where I optimized network infrastructure and fixed connectivity issues. I am comfortable working in Linux environments. I am excited to use my technical skills to solve problems and help engineering and IT teams. I am a Computer Science student who's highly adaptable and eager to add value to Computer Science teams.

EDUCATION

Bachelor of Science in Computer Science

Maseno University — main campus | September 2022 – expected Graduation(November 2026)

Relevant Coursework: LAN Design & Implementation, Database Management Systems, Object-Oriented Programming, Data Structures & Algorithms, Software Engineering.

Kenya Certificate of Secondary Education(KCSE)

Kisumu Boys High School | Jan 2018 - April 2022

Kenya Certificate of Primary Education(KCPE)

Bhayani Primary School | 2013-2017

TECHNICAL SKILLS

- **Databases & Tools:** PostgreSQL, SQLite, Git, GitHub
- **Languages:** Python, JavaScript, SQL, HTML/CSS

- **Frameworks & Libraries:** FastAPI, React, Django, Django REST Framework
- **Networking & Security:** Router & Switch Configuration, Network Troubleshooting, WAN/LAN Design, Linux (Ubuntu), SSH Hardening, Wireshark

PROFESSIONAL EXPERIENCE

KALANET COMMUNICATIONS — *Kisumu, Kenya Industrial Attaché (Network Engineering/IT Operations)* | May 2025 – August 2025

- Monitored and maintained network infrastructure to ensure consistent uptime for enterprise and residential clients.
- Diagnosed and resolved complex connectivity issues, handling router configurations and network troubleshooting under tight response windows.
- Collaborated with senior network engineers to optimize local routing metrics and document infrastructure changes.

TECHNICAL PROJECTS

student-dropout-predictor | *Python, Machine Learning, NumPy, Pandas*

- Designed and engineered a machine learning system to predict at-risk students in Kenyan universities using academic and financial data.

numpy-net | *Python, NumPy, Machine Learning*

- Architected a highly modular deep learning neural network framework built entirely from scratch using NumPy primitives.

Full-Stack E-Commerce Architecture | *Django, REST Framework, React, JavaScript*

- Developed a full-stack e-commerce web application featuring robust user authentication, product listings, shopping cart state management, and order systems.

HOBBIES AND INTERESTS

- Playing boardgames(chess)
